

BigCountry
Breeze

Evaporative AirCooler

Cools the way nature cools
by the natural process of evaporation

GREAT FOR:

STABLES / BARNs

WORKSHOPS

AUTOMOTIVE

- Cools up to 300 Sq. Ft. Operates up to 16 Hours on one Filling
- Powerful, economical, instant cooling power for any cooling need
- Simply fill water reservoir, plug in, and feel the cooling power.
- Remote Control Included

1-YEAR

WARRANTY

BigCountry
Breeze

Evaporative AirCooler

Operates up to 16 Hours on one Filling
Cools up to 300 Square Feet • Remote Control Included

ALSO GREAT FOR:

Home
Businesses
Garage

Barns/Stables
Livestock Areas
Workshops
Enclosed Patios
Warehouses

Loading Docks
Greenhouses
Construction Site
Any zone cooling area

IMPORTANT NOTES

- Unlike air conditioning which recycles stale air, evaporative cooling works best using fresh air. For maximum performance, always leave a window open to allow fresh air to enter the room.
- Evaporative coolers are environmentally friendly using no refrigerant, and therefore contains no CFS's or HCFC's.
- When filled, the cooler will contain water. Ensure it is moved carefully to prevent spillage
- Always turn the cooler off and unplug when not in use or before servicing
- Do not store anything on top of cooler
- Routinely inspect electric cord and plug for damage. Never use if any damage is visible.
- Cooling capacity, operating times, and other product specifications may vary and are subject to change without notice.

Evaporative Air Cooler

Operates up to 16 Hours on one Filling
Cools up to 300 Square Feet • Remote Control Included

Key Features

- **Lightweight & Portable**
Four moving casters
High-impact ABS construction
- **Easy to Use**
Standard electrical outlet connection
— just plug in & cool
- **Oscillating Louvers**
- **Economical Operation**
Evaporative coolers use up to 70% less power than an air conditioner to cool the same area
- **Efficient Evaporative Cooling Process**
Cools the way nature cools, using the natural evaporation process

The high-powered blower wheel draws warm, dry outside air through a moistened pad. The natural evaporation process cools the air as it passes through and is returned to the room as naturally cooled, fresh air.
- **Extra Cooling Capacity**
Just add ice to the unique ice tray for even more cooling capacity
- **Electronic Touch Pad Controls**
3-Fan Speeds
8-Hour Auto Timer Feature
Oscillation Control
- **Remote Control Included**
Full function control operates from up to 10 ft away
- **High Power Blower**
Up to 850 CFM air flow for powerful air circulation
Strong cooling breeze will create an effective cooling temperature that feels even cooler than that actual evaporative cooled air.
- **Multi-use**
Use as a fan only or fan and cooler combination
Use as a cooler in summer and a humidifier in winter

Evaporative Air Cooler

Operates up to 16 Hours on one Filling
Cools up to 300 Square Feet • Remote Control Included
